goke.akanbi@gmail.com | github.com/wcoolers | <https://wcoolers.pages.dev>

TECHNICAL SKILLS

JavaScript | MongoDB | Express.js | React | Node.js | Bootstrap | Git | CSS3 | HTML5.

PERSONAL STATEMENT

I am a self-taught Web Developer. I fell in love with the magical powers of coding while working with developers to create a digital solution. I relish every moment writing lines of code and creating magical results. My motivation stems from a desire to create beautiful digital solutions.

DEV PORTFOLIO

- Built a multi-language dictionary PWA using the dictionary API.
- Built a PWA for tracking income and expenses, deployed with cloudflare pages.
- Built a movie search app with react.js using the FMDDB API
- Designed and published an optimised music website, using WordPress – <https://coolersmusic.com>;
- Built a responsive sign-up page with React
- Built a single page typing speed tester with JavaScript to improve user typing speed;
- Designed and published my personal portfolio website (<https://wcoolers.pages.dev>) using React;
- Freelanced as a remote tester for testerwork.com to improve product efficiency;
- Built a chrome extension for tracking leads with JavaScript to help sales reps with follow-ups (locally deployed)
- Built a Bored Bot chrome extension with JavaScript leveraging the boredAPI and crypto API (locally deployed)
